SALMON'S ALMANACK

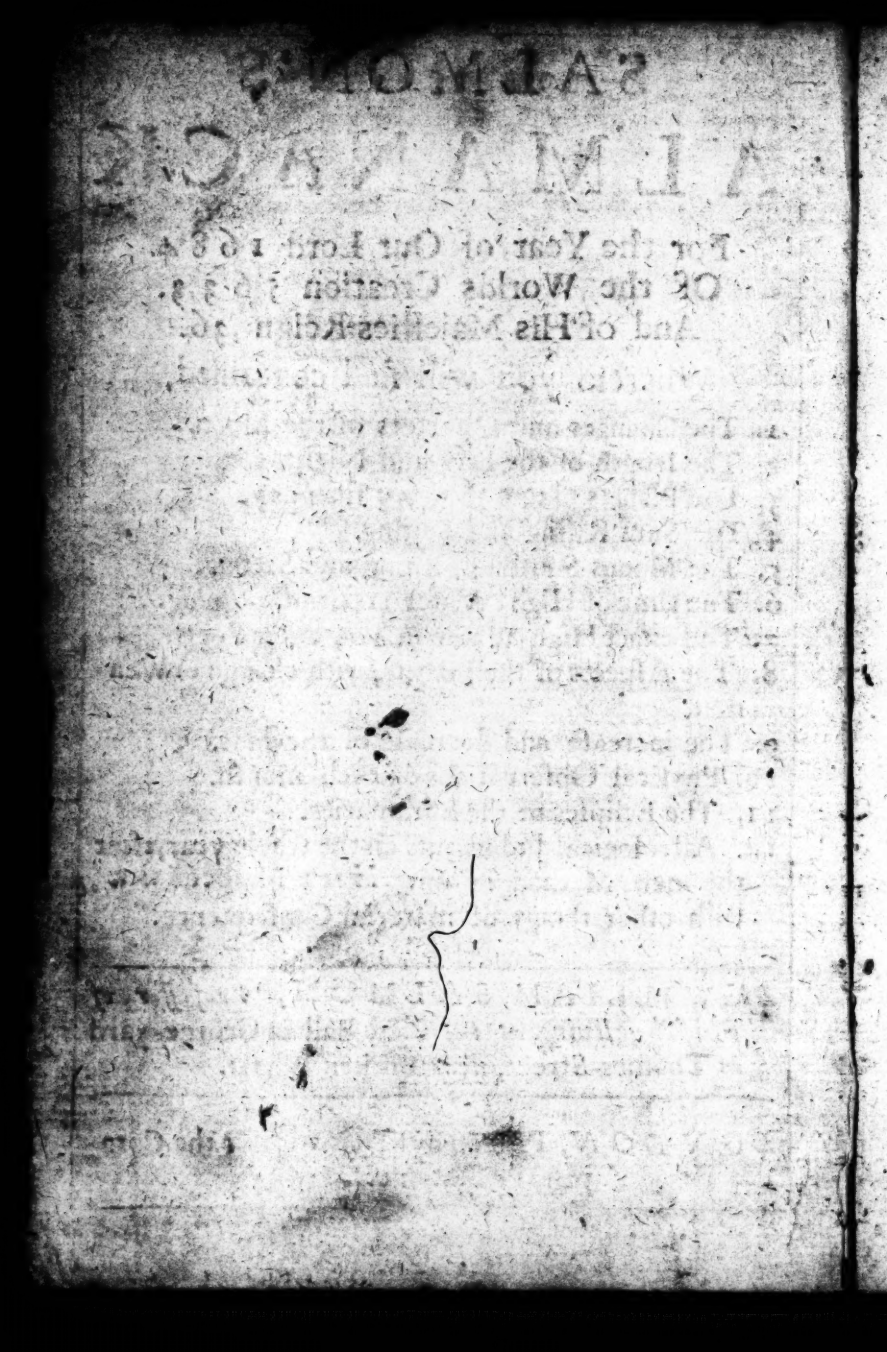
For the Year of Our Lord 1684.
Of the Worlds Creation 5633.
And of His Majesties Reign 36.

Wherein you will find contained,

1. The Changes and Quarters of the Moon.
2. The length of the Day and Night.
3. The Planets places to every fifth day.
4. The Suns Rising and Setting.
5. The Moons Southing, Rising and Setting.
6. The time of High-Water at *London-Bridg.*
7. The exact High-Water in 106 other Ports.
8. The Aspects of the Planets, with change of Weather.
9. The increase and decrease of the days.
10. Physical Observations on each month.
11. The Eclipses of the Luminaries.
12. Astrological Judgments on the whole year, after the new Method in our Horæ Mathematicæ, with other things of material Consequence.

By WILLIAM SALMON, *Professor of Physick, living at the* Blew Ball *in* George-yard *in* Thames-Street, *near* Broken Wharf.

LONDON, Printed by T. Dawks, for the Company of Stationers. 1684.



THis is the first time of our appearing to the World in this kinde whether it may please or displease, we know not; however we have done our endeavour, both to satisfy the curious Artist, in what respects the highest and most abstruse points of Art; and to benefit the Common or Vulgar man, in those things which may contribute to his Health, so far as it has respect to Art; we have with great curiosity given you, I. The Moons Rising, Southing and Setting, with the exact time of High-Water at London-Bridg, from whence the exact time of High Water may be known in above an 100 several Ports, in a particular Table adjoined. II. Annual Judgments upon the whole year, from the more refined Rules of Art, vastly differing from the vulgar Precepts. III. We have given Observations upon the late Triple Conjunction of Saturn and Jupiter, according to the new method in my Horæ Mathematicæ, a Book of good use to those who have occasion to apply themselves this way; Also Observations of the two late Comets, with singular judgments deduced therefrom, according to the new way of judging Mundane events, in the Book before mentioned, shewing how they may be continued for many years yet to come: IV. We have laboured to make it serviceable to the Common people, in such things as may contribute to their Healths; and this we were so much the more induced to do; as we have the perception of a sickly year, wherein the Plague, or some other malign and contagious disease will severely manifest it self: however this we say in general, whether the Pestilence will break forth this year or not, we are well assured from Principles of Art, that that Rod of God will not long ly dormant: For this Cause we have accommodated this work with many plain Directions fit for the capacity of the vulgar; the Medicaments are admirable, and approved of by Experience for the purposes intended: many of them, people may make themselves; but as for the curious, and such as will not trust to their own undertakings in that kind, they may be had ready made and prepared by Apothecaries, or by Mr. John Hollier Chymist living at the Blew-Ball in George-Yard in Thames-street, near Broken-Wharf, being all performed under my sight, and by my directions; where also Catalogues may be had gratis, containing the names of the said preparations, with their particular prices.

☽ 30 July. 1683. W. SALMON.

The Left hand page of the Almanack explained.

1. *ON the top of the page* you have towards the left hand, the Lunations, *viz.* the day and hour of the Change, Full, and Quarters of the Moon.

2. *Towards the right hand of the same* you have the length of the day and night to every fifth day of the month; Where note that the middle figure signifies Minutes: those on the left and right side thereof Hours: *Ex. gr.* On *June* 1 the day is 16 *h.* 20 *m.* long, and the night 8 *h.* wanting 20 *m.*

3. *The first Column shews* the Month days: *the second Column* the Week days.

4. *The third Column shews* the Festival days, and Term days with their returns: as also the increase or decrease of the days every third day for the most part through the year, in hours and minutes.

5. *The fourth Column shews* the hour and minute of the Moons Southing; by which may be known the hour of the night, by the shadow of the Moon upon a Sun-Dial: Thus, Add the hours and minutes of the ☽'s Southing, to the time of the ☽'s shadow upon the Dial; the summ (abating 12 hours, where it may be) is the time of the night.

6. *The fifth Column shews* the time of Full Sea at *London Bridge*, in hours and minutes.

7. *The sixth Column shews* you, 1. The Lunar Aspects. 2. The Planets mutual Aspects. 3. The Weather: Where note, That those that stand first, happen first; those which are placed before a full point happen in the forenoon; and those which stand after a full point, in the afternoon.

The Right Hand page of the Almanack explained.

8. *ON the top of the page* you have the places of ♄. ♃. ♂, ☉. ♀. ☿. and ☊. in Signs, Degrees and Minutes, to every fifth day of the month, by which it will not be difficult to make proportion at sight, for the intermediate days.

9. *In the next Column* on the said top, you have the Suns rising and setting in hours and minutes to every fifth day of the month, *Ex. gr.* on *June* 1 the ☉ rises at 3 *h.* 50 *m.* in the morning, and sets 50 *m.* before 9 at night; which is at 8 *h.* 10 *m.* the like understand in any other day.

10. *The*

10. *The first Column* of the Old right hand page shews you the days of the month, with the respective Sundays thereof, denoted by this Character, ☉.

11. *The second Column shews* you the Moons place in Signs, Degrees and Minutes.

12. *The third Column shews* you the Moons rising and setting in hours and minutes; it shews the time of her Rising, from the Full to the Change; and the time of her setting from the Change to the Full.

13. *The fourth Column* contains certain Physical Observations, with several other things of material consequence, and well worth the knowing.

The Astrological Characters explained.

14. *The Planets Characters.* ♄ Saturn. ♃ Jupiter. ♂ Mars. ☉ Sol. ♀ Venus. ☿ Mercury. ☽ Luna. ⊕ Terra.

15. *The Signs of the Zodiack.* ♈ Aries. ♉ Taurus. ♊ Gemini. ♋ Cancer. ♌ Leo. ♍ Virgo. ♎ Libra. ♏ Scorpio. ♐ Sagitary. ♑ Capricorn. ♒ Aquarius. ♓ Pisces.

16. *The Aspects of the Planets.* ☌ Conjunction. ⚹ Sextile. □ Quartile. △ Trine. ☍ Oppositon.

17. *The Nodes.* ☊ Caput. ☋ Cauda. ⊕ Fortuna. A. Antiscion.

ADVERTISEMENT, now in the Press:

Ars Chymiæ; Or, The Art of Chymistry compleated: Being an Explanation of the sixth Book of the *Dispensatory*. *Theorically* and *Practically* explicated, In three Books. The *first* methodically exhibiting all the Operations in *Chymistry*; together with the Forms of the various Furnaces, Vessels and Instruments and their Applications to the Preparations of all sorts of *Vegetables*, *Minerals*, and *Animals*. The *second* methodically explicating the *Chymical* Forms of Medicaments, and Application of the same to particular Prescripts, wherein is exhibited several pieces of *Medical Antiquity* worthy to be known of all Professors of Art. The *third* a Treatise of *Specificks*, wherein the choicest Treasures of the whole Art of *Physick* shall be unfolded, and fitted to the meanest Capacity. Sold by *Thomas Dawks*, at the West-end of *Thames Street*: where most certainly, all the Doctors Book are to be had, notwithstanding all the Excuses and Denyals Gentlemen are answered and put off with, by some ill kind of Persons that have them not.

Physical Observations.

How to prepare Essences of cooling Herbs.

Take juice of Plantane or Purslane, or both, a Gallon; Spring-water, 2 quarts; brown sugar, 2 pounds; Sal Prunellæ, 2 ounces; mix & dissolve over a gentle heat; with Ale-yest work it together; when settled, draw it off in bottles, & keep for use: *Thus make essences of cooling herbs. Of this take* 4 or 5 *spoonfuls, morning, noon & night, alone, or in Ale: I have known many cured not only of the Scurvy in a hot constitution, but also this excellent against the Stone and Gravel in Reins or Bladder; it takes away heat & pain in pissing, all stoppages of Urine, making one piss freely. Those that love not the former Syrup may take this, tho' the Herbs can't now be got, provide them in their season and keep them for use. Purging is excellent for cure of the Scurvy, in both constitutions; wherefore I commend my* Family Pills, *to be taken once a week for* 4 *or* 5 *times, Spring & fall, or as necessity requires: I have known these Pills do wonders in curing this Disease as also in the cure of the* Dropsy, Gout, Jaundice, *& all sorts of Agues: You may have them almost at all the Great Towns in* England, *with Directions: See their Preparations, Vertues, and Uses in my* Do-on Medic. *p.* 302. *and in my* Dispensatory, *lib.* 4. *p.* 702.

Phyſical Obſervations.

For ſurfeits, pricking of the Blood, Itching, &c. *For the cure of theſe ſymptoms, Vomiting, purging and ſweating will be neceſſary. As ſoon as a ſurfeit is new taken, and the patient finds himſelf ſick at ſtomack, by reaſon of eating or drinking too much; or by drinking too liberally cold drink; when they were hot, whereby the inward parts were chilled, the blood corrupted and the humors putrefied, thereby cauſing blewiſh ſpots up and down ſeveral parts of the body, and in ſome breakings out, and in others itchings and prickings of the blood, &c. Let the ſick take a doſe of* Vomiting Lozenges *in the morning faſting, (or if it may be preſently after taking the ſurfeit) and then take plentifully either Mutton broth or poſſet drink after them, till they have done working: if the ſurfeit has been of long continuance you ought to repeat the doſe 4 or 5 times every 4th or 5th day: and in the intermediate days in which you take no vomit, to take the* Elixir proprietatis *3 times a day, viz. morning, noon, & night from 30 to 60 drops at a time in a glaſs of Ale or Sack. Or. The ſick may take of my* Family Pills *3. 4. 5 or 6, according to age and ſtrength, 4. 5. 6 or 7, doſes, repeating the doſe every 3d. or 4th. day, they will perfectly take away the ſurfeit, cure the Scurvy, purifie and ſweeten the blood, remove itching & breaking out of any be, and rectifie all the evil humors, for theſe pills will truly perform all that can be expected by any purging medicine, being alſo profitable againſt the dropſie, jaundice, gout, green ſickneſs in Virgin, obſtructions of the liver, ſpleen, & meſentery, all ſorts of Agues & Fevers. After the vomiting, or purging let the patient ſweat very well with Our* Laudanum, *or our* Guttæ vitæ, Elect. ad Tabidos, *or* Powers of Guajacum; *for which ſee my* Diſpenſatory *and Doſes.*

Physical Observations.

Against burning fevers, which commonly afflict people in summer time.

These kinds of fevers are best cured by sweating which may be performed admirably by these things. Take venice treacle half a dram: tincture of antimony 20 drops: bezoar mineral 8 grains mix them for a dose: *after the taking of which let the patient immediately take an ounce of spirit of saffron alone, & be covered to sweat. Or this,* Take spirit of saffron 1 ounce: damask rose-water 6 ounces: extract of saffron half a dra. english bezoar, 10 grains: mix for a sweating potion. *Or this,* Take guttæ vitæ from 20 drops to 40 or 50, syrup of lemons 1 ounce: angelica water or carduus water 4 oun. mix for a draught. *Or,* Take english bezoar, bezoar mineral, of each 15 grains: venice treacle a dra. mix them. *These medicaments you may see in my* dispensatory *&* doron: *& the English* bezoar *in my* Chymistry *now in the press: for the cure of all fevers see my* synopsis medic. *l. 3. c. 23. where all sorts of* fevers *&* agues *are handled at large. After the feaver is abated, you will do well to cleanse the body by purging with my* family pills, *than which, I am satisfied a better purge cannot be taken: them that cannot swallow the pills may take the tincture of the same which will purge admirable well. Or this,* Take Sena, 2 oun. rhubarb thin sliced 1 oun. spring water 3 pints: salt of tartar half an oun. spanish juyce of liquorice 2 dra: make an infusion to redness: *This cleared liquor will make 8 or 10 purges: it cures all sorts of fevers, gout, dropsies, & expels all watery humors from the whole body*

Physical Observations.

A cure for the Dropsie.

This is commended as a thing which never fails. Take bean straw ashes, broom ashes, ashes of wormwood of each alike quantity mix them. *Of this mixture the sick may take 2 scrup. or a dra. once or twice a day as they see occasion; & to continue the same for about 5 weeks time or more: drinking after it a glass of white or rhenish wine: it will certainly cure; during the use thereof you may purge once in every 10 days with our* family pills, *or if you please with this.* Take cambogia 12 gra. calamelanes half a dr. conserve of wood sorrel, 3 dra. *mix for 2 doses: you may increase the dose of the gum for 6 times till it comes to 20 gra. or you may purge with* Bontius *his pills mentioned in our* Doron *p.* 625. *you may give them from 15 gr. to 25. Or you may purge with the* Elixar of Elaterium, *the making & use of which we have taught in our* Ars Chymiæ *now in the press: See the compleat cure of the* dropsie *in our* Synopsis Medicinæ *l.* 3. *c.* 32. § 4. *Dr.* Willis *his tincture for dropsies.* Take dwarf elder, English orrice of each an ou. & half: soldanella, hedg hysop of each a handful: assarabacca, wild cucumber roots of each 2 oun. roots of the lesser galangal 3 6 dra. Jallap half an oun. Elaterium 3 drams: Cubebs 2 drams: cut, bruise & put thereto small spirit of wine tartarised 3 pints: digest close stopt in sand for 48 hours, strain, & depurate by settling, *dose 2 or 3 spoonfuls in sack. The vertues of these and other herbs see in my* Botanologia, *or* Herbal *now in the press.*

Physical Observations.

For coughs, colds, hoarseness, asthma's and shortness of breath.

Outwardly the breast, stomach, & bowels may be bathed with powers of aniseeds, *or* powers of rosemary, lavender, or amber. *Inwardly, let the sick take* panacea paracelsi *or the* Vulnerary spirits of Vitriol *or* sulphur *in all that they drink, making their liquor as sharp as they can well endure it, for these things wonderfully open all obstructions of the breast and lungs and parts adjacent. But if the sick cannot bear sharp things you may give our* guttæ vitæ *every night going to bed* á gut 20 ad 40 *or more in a glass of ale: or the sick may take of our* laudanum *from* 2 *gra.* to 7 *or more according to age custom and strength, in like manner at night going to bed: after which, if the cough be very violent let the sick take* 2: 3 *or* 4 *ounces of the spirit of saffron, very well sweetned with white sugar, or with syrup of purslane, or syrup of poppies, or some pectoral syrup. which done let him repose to rest. Moreover in the morning fasting he may take the quantity of a nutmeg of our* electuary ad tabidos: *or* 10 *gra. of volatile salt of harts horn in a glass of tent. These medicaments thus taken prevail much against consumptions, phthisick, ulcers of the lungs, & other diseases of those parts proceeding from obstruction, provided they be skilfully & constantly used: for the cure of these diseases see* l. 3. *of our* Synopsis Medicine. *In our* Herbal *(now in the press) you will find many particular simples for this purpose summed up together.*

Physical Observations.

For the Rickets in Children.

The remedy which is most commonly appointed for the cure of this disease is syrupus de scolopendrio, *or syrup of harts tongue, but that which experience more admirably commends in this case is* ens veneris *which see in our* dispensatory, p. 285. *it may be given from 4 gra. to 10 or 12 in canary or any proper syrup. It not only cures the rickets in children, but also kills worms of all sorts, performing these things beyond any other medicine. It is good in pluriſies, fits of the Mother, stone, opens all manner of obstructions in any part, & stoppage of urine, & is of approved use in the cure of Consumptions.*

Of a stinking breath.

The causes and cure of a stinking breath we have we have taught in our Polygraphice *l. 4. c. 39. but because that book is not in every mans hand, you may observe these directions: first vomit, or cleanse the stomack well with our Vomiting Lozenges, (which you will find in our* Ars Chymiæ,*) which may be repeated 3 or 4 times as need requires: after purge & cleanse the whole body with our* family pills *4 or 5 times: then wash the mouth every morning & evening with* juyce of Limmons, *& about half an hour after which our* Regulata, *& by this means the cause of a stinking breath will be taken away: this done you may chew* Gentian, Virginia snake-root, Contrayerva *or* sassafras *in your mouth, and now and than take inwardly in a glass of sack, some few drops of the* powers of cloves.

This Tide Table uſed according to the following directions will be much more exact than the common tide tables, by an hour or two ſometimes, which is a moſt egregious error in the Vulgar *Almanacks*: for here having the time of high-water or full Sea at *London Bridge*, truly calculated, you will have the time of high water in the foregoing Ports alſo exactly thus. *Find the Port where you would have the time of full Sea in the former Table, againſt which you have certain hours and minutes, which reſerve: then look in the Almanack, and againſt the day of the month in the fifth colum on the left hand you have the time of full Sea at* London-Bridge *in hours and minuts, M ſignifying morning, A. afternoon: now if you add the hours and minutes of full ſea at* London-Bride, *to the hours and minutes before reſerved; the ſum is the true time of high water in the ſaid Port.*

Example, On *April* 10. I would know when it will be full Sea at *Briſtol*: firſt in the former Table I find *Briſtol*, and againſt it 3 *h.* 45*m.*; which I reſerve. Then againſt 10 *April*. I find full Sea at *Lo. Br.* at 6 *h.* 9*m.* theſe added together make 9 *h.* 54*m.* the true time of high water at *Briſtol*. The like underſtand of any other. Where note that if the ſum of the two numbers exceed 12 hours; caſt away 12 and take the remainder. Now by the Tables in the Common *Almanacks* the time of high water would be at 11 *h.* 33*m.* which is 1*h.* 39*m.* too late; a very groſs error, which may make a paſſenger loſe his Tide.

1. THere will be four Eclipses of the Luminaries to wit, two of the *Sun*, and as many of the *Moon*: of which, the first of the *Sun* will not be seen of us.

2. The first will be an Eclipse of the *Sun*, on 6 *January*, at 16 a Clock at night in ♑ 26°. It will be a great Eclipse, for about 11 digits of the Suns body will be darkned: It will not be seen of us, for it happens after Sun set, and is celebrated in the sixth House. It will be visible in the *West Indies*, where its chief Influence will be. It will have relation to Cattel, Servants, and the Subjects of Kings and Princes: shewing the hurt, ruin and destruction of the Common people, sickness, &c.

3. The second will be an Eclipse of the *Moon* on 17 *June*, about 3 a Clock in the morning in ♑ 6°. It will be no very great Eclipse, but may be seen of us, because it will be before Sun-rise, and is celebrated in the eighth House, foreshewing the Death and Mortality of mankind, I pray God, it be not the fore-runner of a Plague. Here is to be noted that these two Eclipses happen in ♑, the 10th. from ♈, *Englands* and *Germanies* Ascendent.

4. The third will be an Eclipse of the *Sun*, on the 2 *July*, in ♋ 21°. about 3 in the Afternoon: It will be a great Eclipse, for near 10 digits of the Suns body will be darkned (but *Argol* makes it total) and may be seen of us, it being celebrated in the Ninth House, and ending in the eighth, the House of Death. It signifies in part, the affairs of the Church, Fleets of Ships at Sea, Holland and Scotland, and other places subject to that Sign, as also the Death and Destruction of mankind: in which respect it may confirm the signification and effects of the former.

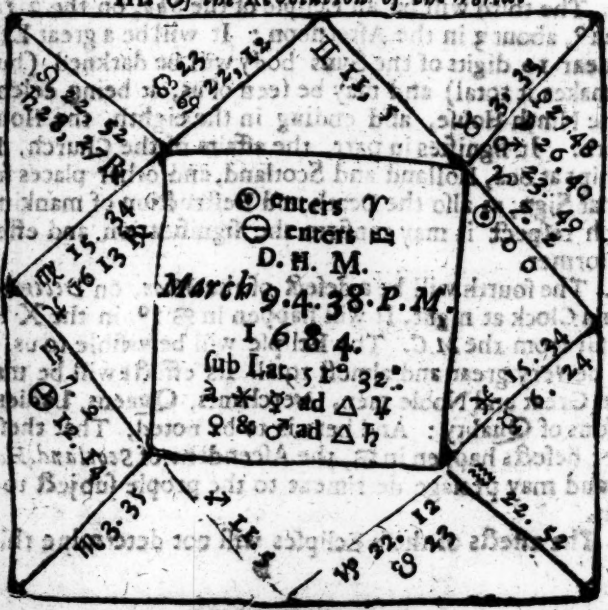
5. The fourth will be a defect of the *Moon*, on *December* 11: at 11 a Clock at night. It will happen in ♋ 1°. in the X House, not far from the *M.C.* The Eclipse will be visible to us, and it will be very great and almost total. Its effects will be manifest upon Great and Noble men, Merchants, Queens, Ladies, and persons of Quality: And here is to be noted, That these two latter defects happen in ♋, the Ascendent of *Scotland*, *Holland*, &c. and may presage detriment to the people subject to those Signs.

6. The effects of these Eclipses will not determine this year

1684. but be more amply manifest in 1685. near which time I fear the Plague or Pestilence will break out upon some part or parts of these *British* Iles; which I pray God avert; certain I am, That in the main they presage Sickness, and such Diseases as will prove Contagious, and for the most part mortal.

7. In all these cases both for prevention as well as cure, I shall advise all such as have respect to their Health and Lives, to be provided with such Antidotes as may have power to dispel the Infection, and overcome the poyson and malignity of those pestiferous Diseases: The principal of these are, 1. *Our New London Treacle*, a thing of admirable use. 2. *Orvietanum verum*, a Medicine much cryed up, and a very good thing. 3. *The Tincture of Antimony*. 4. *The Pestilential Balsam* of *Schroder*. 5. *Elixir Alexiterium*. 6. *Elixir of Bay-berries*. 7. *Elixir of Rue*. 8. *Our Guttæ Vitæ*, a Medicine inferior to none. 9. *Bezoar Mineral*. 10. *Electuarium ad Tabidos*. 11. *Powers of Cloves*. 12. *Powers of Rue*. 13. *Volatile Salt of Harts-horn*. The preparations Virtues and Uses of which you may find in Our *Pharmacopœia*, page 207. 301, 321, 493, 607, 671, 746. and in Our *Dorotheus*, page 185. 405. 438, 441. 447. 605.

III. *Of the Revolution of the World.*



1. In judging of the Revolution of the World, you ought to consider the Ascendents of Cities, Nations and Countreys, and upon what Houses of the Revolution the said Ascendents are posited, and how likewise they are aspected and made fortunate, or afflicted and unfortunate, according to the Rules which we have delivered in Our *Mathematique*, *lib. 2. cap. 7.* where we have given Directions at large.

2. Having erected the Figure (which we have here done from the *Caroline* Tables,) and drawn it into a *Speculum*, as here you see, you will find that ♈ the Ascendent of *England, Denmark, Germany, Florence, Naples, Padua*, &c. is placed upon the Cusp of the VIII. which bespeaks Death and Mortality to the Vulgar people of those places; to some by malignant Diseases, the Plague, &c. To others by Famine and Scarcity of Food; to others by Wars, sacking of Towns and Cities, devastation of Countreys, &c. according to their Climates, Scituation, Neighbourhoods, &c.

3. As the same Sign is afflicted by the ☌ of the ☽ and ☿, and by its position upon the Cusp of the VIII. so also is assisted by the presence of ♂ in the same with the △ of ♄:

These configurations make those people active, and gives them Friends, and possibly may signify to us as to his relation to the German Nation, the probability of Accord with their Enemies; but alas ♂ is not long Triumphant, but in a very little time goes out of ♈ into ♉, his Detriment; where although he may meet with the ✶☿ and △♃, yet he comes again to the malicious □ of his old Adversary ♄, and that at a time when he is scarcely able to help himself. Moreover ♀ as she is Lady of the 7th House ♈, so she signifies the publick Enemies of those people rather than Friends, and so much the more as she is posited therein in her detriment; whereas had she been in another House, in ♎ or △ to ♈ or ♂ its Lord, she might have signified in good Earnest, their Friends, or the making an end of Differences.

♉ *Taurus* is the Ascendent of *Poland*, *Ireland*, *Russia*, *Persia*, *Bosnia*, *Parma*, &c. and is placed upon the Cusp of the IX. in the Revolution; whereby is signified Change, or Troubles in Religion, the sending of Ambassadors to strange and foreign Princes, Sea-faring, &c.

☽ It is befriended with the ✶☿ and △♃; but extreamly afflicted by the □ of ♄, which happens towards the latter part of the year. It bids the *Polander* beware of the *Turks* and *Tartars*, lest they make an Inroad into their Country; ☽ Lady thereof is in ♍, the 12 from ♉, which signifies the poor and low estate of those people, threatning them with Famine, Devastation, Captivities, and many other mischiefs. But ☽, in a short time will recover her self; and coming into her own House meets with the ✶☿, and △♃, whereby she enters into a new Confederacy; however she will suffer towards the latter end of the year, when she shall come to the □ of ♄.

☉ Under *Gemini* are *Flanders*, *London*, *Bruges*, *Norimbergh*, &c. It is posited in the X. house of the Revolution, and signifies Honour, Glory, Renown and Happiness to those places under that Sign; or at least, a certain kind of happiness, in respect of the several ills they of late have suffered; yet however they will not be totally free from afflictions and misfortunes; for the Sign is afflicted by the □ of both ☿ and ♃; by the first is signified partly some of their own inhabitants, which may create disturbance, and some particular person or persons having ☿ Lord of their Ascendent, who may afflict them; by the second is signified the publick Enemies to those Cities and pla-

places, whether natural inhabitants or others, I will not determine; for ♃ is Lord of ♂, the 7th. from ♊, who is also the significator of the Clergy, or that Religion which is uppermost.

7. But it is befriended with 4 Sextiles, to wit the ✶ of ♂, ♀, ☽, and ♄, which are as so many arguments of good to the people and places subject to that Sign ♊; ♀ in *England* may signify the *Tory* party, as being Lady of ♎, the 7th. from ♈, the Kingdoms Ascendent, and so may signify their publick Enemies, *&c.* but of what particular signification all those several Sextiles may be, I shall leave you to search out of my *Hora Mathematica*, lib. 4. cap. 7. sect. 29. 44, 45, 47, 48, *&c.* In the 26. sect. of the same Chapter, you have these words: *The Ascendent of any place upon the Cusp of the Tenth, signifies Honour, Glory and Renown to that people; the Victory over their Adversaries, if in Controversy with any; the delight, unity, and sympathy of the people and their King and Rulers, or chief Magistrate.*

8. Under *Cancer* are *Scotland*, *Holland*, *Constantinople*, *Tunis*, *Venice*, *Genoa*, *York*, &c. It is placed chiefly in the Tenth; assisted by the presence of ☌, and the △ ♀ and ✶ ♃, but afflicted by three Quartiles of ♂ ☽ and ♀ from the Sign ♈. But as the two latter faces of the Sign are in the Eleventh, so it signifies that the latter part of the year, (wherein are the Evils signified by the now mentioned configurations,) shall pass full of hopes, comfort and content, as if the substance of their Evils should vanish, by the prospect of Peace, Unity of minds, acquisition of Friends, making of Leagues, Friendships, *&c.* Moreover it signifies that those people should get Treasure and grow Rich by their *Maritime* affairs, by reason of the benign ✶ ♃ lord of the 9th. from ♋ assisting them.

9. Under *Leo* are *Italy*, *Sicily*, *Bohemia*, the *Alps*, *Rome*, *Prague*, &c. The Sign is posited partly in the Eleventh, partly in the Twelfth of this our Revolutional Figure; as though the latter end of those people should be worse than their beginning; I mean in respect to what has relation to the year present. The Sign is blest with the Trines of ♂. ☽, and ♀, from ♈ which signify the Confederates and Friends of those People, and indeed some hopes of good; but the affliction of the presence or body of ♄, who signifies the *Turks* and *Tartars*, overthrows and counterpoises all that seeming good; and bids those people beware of future mischiefs, and indeed and in Truth signifies in Conclusion a total Conquest of all those Countreys by

the Turkish power, which will run the whole course certainly over-run the whole *Roman* Empire. The bodies of the Superiours are weighty, and they overturn any good signified where their presence is, meerly by their ponderosity: *Much* sickness is also signified to those people.

10. Under *Virgo* are *France*, *Silesia* the lower, *Paris*, *Lyons*, *Bazil*, &c. of which, its three first faces are placed in the XII. its three latter faces in the *Ascendent*. This signifies in the first half of the year, Sickness, Diseases, Sorrow, Losses, Crosses, Death of great Cattel, with a thousand other afflictions, *Horæ Mathemat. lib. 4. cap. 7. sect. 28.* But in the latter part of the year it signifies Health, Joy, Happiness and Prosperity to that People, and an Advantage against their Adversaries if engaged in any Trouble; and these Judgments indeed would have been the more firm, had not the weighty presence of ♄, (lord of the 7th. from the Sign ♂) by his ponderosity in a great measure destroyed the same; but that is not all, for ♄ perfectly hates the place, as being his detriment, and obnoxious in Triplicity to his Nature, whereupon he acts in this place the part of the greatest of Infortunes. But evil to those places under ♍ is not only simply intended by the presence of ♄; but also by ☌ ☿, as though those people shall do some things in order to their own ruine.

11. Under *Libra* are *Austria*, *Alsatia*, *Livonia*, *Lisbon*, *Antwerp*, *Vienna* in *Austria*, &c. It is placed upon the Cusp of the II. and afflicted by the ☍ of ♂, ☽, and ♀; which signifies Wars, Ruin and Destruction to those people, by reason of Wars, Blood-shed, publick Calamities, and such like; for ♂ is Lord of the 7th. from ♎, and therefore signifies their publick Enemies; and ♀ Lady of the Sign ♎, is in ♈, disposed of by ♂, and afflicted by his presence, which signifies Captivities, Imprisonments, and other Afflictions to those wretched people. If any thing at length relieves them, it must be the *Sextile* of *Saturn*, to wit, a submission to the *Turkish* power, for that will certainly over-run the *Popish Territories*; and these evils are strengthned by the ☌ ☽, who so far as she has signification of *Constantinople*, and other *Turkish Territories*, has so far a signification of the *Turks* also.

12. Under *Scorpio* are *Norway*, *Bavaria*, *Algiers*, *Vienna* in *France*, &c. It is placed in the third House, which signifies trearing with Neighbours and allys, sending Ambassadors and

the

the like. It is befriended by the *trine* of *Mercury* and *sextile* of *Jupiter*, which may in part confirm the former Judgment, especially as to what relates to the former parts of the year; however before the termination thereof it is severely afflicted by the □ ♄ ☽ which signifies not only Trouble from or by means of the *Turks*, but also by some Neighbouring Nation or People, for ♄ is lord of ♍, the third from ♏: ♂ 'tis true, is in ♈, essentially strong, in the latter part of the fifth face of that Sign; which shews no long stay in so good a condition; that face also is of the nature of ♄, which shews Contempt, with a multitude of Dishonours. *Horæ Mathemat. lib. 1. cap. 2. sect. 20.*

13. Under *Sagitary* are *Hungaria, Dalmatia, Spain, Collonia, Buda*, &c. It is placed in the IV. afflicted by the □ of ☿ and □ of ♃: ☿ here has signification of the *Turks*, as he signifies the publick Enemies of the *Hungarians*, being Lord of the opposite Sign; but towards the latter end of the year good is signified to those people, by reason of the 4 *Trines* of ☉, ☽, ♀, and ♄, which signifies the amity both of Friends and Foes; much more we might say, and many other Judgments might be made, but we must now desist, being limited by our stinted scantling of Paper: These brief Observations being chiefly wrote for the sakes of Artists.

IV. *Of the Conjunctions of* Saturn *and* Jupiter.

1. THE Conjunction of *Saturn* and *Jupiter* which first happened *October* 17. 1682. in 20 ♌; and was afterwards twice again repeated by reason of those *Planets* Retrogadation, *viz. Jan.* 26. 1683. in 17 ♌: and the 10 *May* following in 14 ♌, can be accounted but as one continued Conjunction, and of that kind which is called *minor* or lesser, as we have delivered in our *Horæ Mathematicæ*, lib. 4. cap. 11. sect. 4. but by reason of its reiteration may not improperly be called *Maxima*, rather than those which *Lilly* so terms, which are first made in ♈, upon the return of the fiery *Trigon*, which kind indeed never happen.

2. The force or effects of these lesser Conjunctions continue to 20 years from the time of their Celebration: and the said effects encrease in power till they come to their ☍; after which they something decline: but this

Triple Conjunction may probably contribute its effects for the [illegible] proportion of malice.

4. In our said [illegible] lib. 4. cap. 12. sect. 13. we say those Religions, Monarchies, Kingdoms, Cities or Families which arise upon return of the Fiery Trigon shall be broken and destroyed upon the return of the *Watery*, and contrariwise; the same you must understand of the *Earthy* and *Airy*; because they are opposite in qualities.

4. This our Conjunction happens in ♌, under which is *Rome*, *Italy*, and the *Popish Religion*: the reiteration of the ☌ shews the reiteration of its effects: and being celebrated in ♌, the detriment of ♄, the ruine of those places and that monstrous Religion by those signified by ♄, who is the general significator of the *Turks* and *Tartars*; who like an inundation shall pour down, overflow, and destroy all the *Popish Territories*, they being all in general under the Sign ♌, and the signification of the Sun: and this Judgment shall be the more certain, because the ☌ is thrice repeated.

5. As to the particular signification thereof in this present year, we must consider in what house of the Revolution it happens; which is the XII. from whence we judg Invasions of Territories subject to the Sign ♌, ruin and devastation of Countreys, Captivities, Imprisonments, destruction of great Cattel, &c. and sometimes these Judgments may fall upon particular persons who have *Leo* ascending, or either of their Luminaries posited therein.

6. We cannot but here remind you of the Judgment which we gave many years ago, to wit, in 1671. in Our *Hora Mathematica*; *lib 4. cap. 14. sect. 7.* arising from the ☍ of ♄ and ♅ last, whose effects will go hand in hand with this Our Triple Conjunction: Our words in the place cited are to this effect: *That their effects will not suddenly determine, for several grand mutations by them are signified, and although they may create much trouble during 1674. 1675. and 1676: yet their chief malignity will be manifest in 1680. 1681. 1682. 1683. 1684. 1685. &c. thereby causing many great, Glorious and Flourishing Kingdoms to be brought low, and to mourn in Blood, Dust and Ashes.*

7. This was in part verified in the devastations which the *French* King then made in *Flanders* and the bordering

parts

parts of *Germany*: and since by the *Turks* entring into *Hungary* and *Austria*, Besieging *Vienna*, and threatning the Universal ruine of that Empire, and of all the *Popish* Territories.

8. But to make a more particular Judgment, and to draw it out into length for number of years, in which its effect shall be manifest, you must first draw the *Conjunction* into a *Speculum* for the Noon-Time of the day, in which it happens, in which you shall incert the Planets places: and from thence deduce the directions for the years following, as we have taught in the Book aforementioned, *lib.4. cap.11. fol.14,15.* and as you may see in the following Operation: But because the Conjunction is Triple, you ought to make a Triple *Speculum* in like manner.

	♈	☿	♉	☌	♌	♍	♎	♏	♐	♑	♒	♓

9. The significations of all these Directions we have not here room to declare, hereafter we may make their Explication: but from these Directions, and the Annual Transits of the Planets by the ☀, □, △, ☍, and place of the Conjunction together with the Planets mutual Aspects yearly as they occur, a most significative Judgment of the affairs of *Europe* may easily be drawn.

10. The three Conjunctions being drawn into three *Speculums*, you will find ♑ the *Ascend.* of *Rome*, *Italy* and *Romish Religion* in all three, to be afflicted by the presence of *Saturn*, and in the first, over and above by the *squares* of ☉ and ☿, in the second by three ☍'s, *viz.* of ♀, ☿ and ☉, with the *square* of ☽: and in the third by the *squares* of ☿ and ☉. *Aries* the *Ascend.* of *Germany*, *England*, &c. is assisted in the first by the *trine* of *Venus* (the significatrix of *Poland*) and in the second by the ☀'s of ♀, ☿ and *Sol*, and in the third by the presence of ♀: But it is afflicted in the second by the ☍♂, and in the third by another opposition of the same Planet.

11. *Taurus* the Ascendent of *Poland*, *Ireland*, &c. is afflicted in the first Conjunction by the ☍☉, the *squares* of *Saturn* and *Jupiter*, and the ☍☿: in the second by the five *squares* of *Venus*, *Mercury*, *Sol*, *Saturn* and *Jupiter*: and in the third by the *squares* of *Saturn* and *Jupiter*. *Gemini*, the Ascend. of *London*, &c. in the first is afflicted by the *square* of *Mars*, *opposition* of *Venus*, and *square* of *Luna*: in the second it is assisted by three *trines* of *Venus*, *Mercury* and *Sol*, the *sextile* of *Saturn* and *Jupiter*, and *trine* of *Mars*, in the third it is assisted by the *trine* of *Mars*, *sextiles Saturn* *Jupiter*, and *Venus*; but afflicted by the *square* of *Luna*.

12. *Cancer* the Ascend. of *Scotland*, *Holland*, &c. in the first is assisted by the *trine* of *Sol*, *sextile* of *Mars*, *trine* of *Mercury*, and *sextile* of *Luna*: in the second by the ☀☽, but afflicted by the *square* of *Mars*: in the third it is afflicted

☽ ☍ ♂ ♂ ☽ ☌ ♃ but befriended by the ☌ ☽ the *trine* of ♄, and the ☌ of *Sol*. What these Configurations in particular signify, as also the times wherein those Significations will be manifest, we leave to the scrutiny of the Industrious Artist, who may easily perform the same by the Rules delivered in our said *Horæ Mathematicæ*, lib. 4. cap. 11. sect. 7. 14, 15, 16.

V. *Of the late great Comets.*

1. TWO Comets we shall principally take notice of: the first shall be the great Comet which appeared in 1680, with an extraordinary tail: the second, that which appeared in 1682. and was of short continuance.

2. The first great Comet was first seen the 11 *Novemb.* 1680. till it came up to the Sun. The 15 day it was seen at *Charls Town* in *New England* like a dim Star; at 5 a Clock in the morning. The 16 day, it was seen there with a long stream: the 17 day was Cloudy, so that it could not be seen: the 18 day, between 5 and 6 in the morning, it appeared to the West of *Spica* ♍, with somewhat more of South Latitude: the 19 day it passed very near so as to cover *Spica*, and went along to the North of the *South Ballance*: the 20 and 21 days were cloudy: the 22 day it was in ♎ 3. 20. and almost touched the South Ballance: the 23. or 24. day it became invisible, being got under the Sun-beams.

3. After it had got from under the Sun-Beams, it became visible again, and was first seen the 10 of *December* the same year, in the West. The tail pointed upwards almost perpendicular from the West Horizon, and reached up to the middle of *Aquila*, between the bright Stars in the Shoulders and Tail. The 11. day the Tail was very broad and strong, and reached up to the head of *Sagitta*. The 12 day at 4 *h.* 46 *m.* the head was seen dull and confused; its Tail reached to the middle of *Sagitta*, and was about 35 *d.* in length, and 1 *d.* broad: its Longitude was in ♈ 5. 19. and Latitude 15 *d.* 0 *m.* North. The 13, 14, 15, and 16 days were cloudy: yet upon the 15 day, the Tail was seen to reach to *Anconale australinæ Cygni*, being about 45 *d.* in length.

4. From

4. From the 17 *December* to the 26 *January* inclusive, it was every day exactly observed in one place or another, from which various observations (communicated to us from several hands) we have compleated the following *Ephemeris* of its motion, at what time it disappeared and was seen no more. But these observations are remarkable.

5. On *Decemb.* 18. the Tail reached beyond the *Swan*, and was therefore above 60 Degrees long: On the 21 day the Tail pointed betwixt *Scheider* in the breast of *Cassiopea*, and that in the back of her Chair, being near 75 degrees in length, and near 3 degrees in breadth: on the 24 day at 6 *h.* 24 *m.* the Tail went behind *Cassiopeas* Chair. On the 26 day at 5 *h.* 6 *m.* the Tail passed over a Star in *Pegasus*, but the Moons Light hindred the determination of its length. On the 29 day at 7 *h.* 37 *m.* the Tail passed close by *Scheat*, and betwixt 2 Stars in the North Foot of *Andromeda*. On the 30 day at 8 *h.* 30 *m.* the tail was on the left side of *Scheat*, and pointed up to the Shoulder of *Perseus*.

6. On the 3. *January* at 7 *h.* 45 *m.* The Tail was about 35 degrees long, and passed between the two Stars in *Andromeda's* Girdle. On the 5 day, the head of the Comet appeared near the head of *Andromeda*; the Tail scarcely reached *Alamech*, and therefore was not above 25 degrees long. On the 9 day at 7 *h.* 30 *m.* the head was observed in 18 *d.* 40 *m.* ♈: and on the 10 day at 10 *h.* 15 *m.* it was observed in 21 *d.* 37 *m.* ♈, with 23 *d.* 42 *m.* of North Latitude: The Stream was (as is usual) always opposed to the Sun, when the Comet appeared in the East, the tail was about 30 degrees in length; but when it appeared in the West of much greater length, as is before observed at the aforesaid *Charls* Town, its greatest breadth was observed about 4 degrees, and its swiftest motion was much about 5 degrees in a day.

31	21		0	27	45	15	29		0	21	0	*no more seen.*				

8. The latter Comet was observed on the 16 *August* 1682. and continued 23 days, *viz.* to the 7 *September* inclusive; yet some say that it had its beginning about the middle of ♋, though not observed till the day it entred ♌, and continued to the end of ♎ before it disappeared: so that it visited ♋, ♌, ♍, and ♎. Its motion was Direct, and extream swift, except towards the time of its vanishing; which because it was of no long continuance, and not easy to be observed by reason of the cloudy Air, we shall make no longer discourse of its motion.

8. As to the Judgments of these Comets, we shall be here very brief, rather chusing to refer you to the Rules which we have delivered in Our *Horæ Mathemat. lib. 4. cap.* 10. *sect.* 2. *ad* 23. where I doubt not but the young Artist will receive plenary satisfaction: yet this in short we say, That they shew great Changes and Mutations in the World, overturning of Empires and Governments, Wars and Devastations of Countreys and Kingdoms, the Death of Kings, Princes and great Personages, and a Plague or Mortality among the Common People.

9. As to the time and duration of the effects of the first Comet, it will be of long continuance: but this is to be no-

noted that its Influence shall only be manifested upon the *Eastern* parts of the World while it was in Antecedence to the Sun, to be accounted from the 11 *Novemb.* to the time it became invisible, which was about the 24 of the same Month, so that its influence shall continue about 14 years, beginning at 1680: but its Influence shall be manifest upon the *Western* parts of the World, accounted from the day of its first appearing to the West, or in consequence of the Sun; to wit, from the 10 *Decemb.* to the 26 *January* inclusive, or the day of its total disappearing, accounting a day for a year: so that from the 10 *Decemb.* to 26 *Jan.* being 48 days, its effects shall continue 48 years, beginning at 1680, which year answers to the 10 *December* or first day of its appearance, and all the rest of the years succeeding, to the successive days of the month in a continual and direct order.

10. For the particular Judgments you are to consider the place of the Comet answerable to the year proposed, and see in what House of the Revolution of that year it falls in, and accordingly, having respect both to Sign and House of the Figure, to deduce your Judgment. So in Our Example 1684, being the 5*th.* year from the first appearance, you must consider it place on the 5*th.* day of its appearance to the *West*, viz. *December* 14. and you will find it to be about 12°. ♑, which happens in the IV. House of this present Revolution; which as it is an *Angle*, and the Sign a *Cardinal* Sign, so the effects will be much more eminent; its influence will be upon great Persons, upon Cities, and the fruit and product of the Earth, foreshewing a Dearth of Food, or Famine, War, Bloodshed, ruin of Ancient Cities, delivering up of Towns or Garrisons, and the Plague or Pestilence.

11. *Capricorn* is the Tenth from ♈, and it this year Transits the 4th. from whence arises an odd kind of Judgment, to wit, that the Vengeance which has hitherto seemed to sleep, shall now be awaked, and appear with Violence and Terror, *Hor. Math. l.* 4. *c.* 10. *f.* 14. being with a Tail (the greatest that ever any Comet appeared withal) it shews it self like the Rod of God, to Punish and Chastise Mortals, for their manifold Crimes, Offences and Impieties towards their Creator, and Wickedness to one another.

12 Its

12. Its magnitude shews the greatness of the mischiefs portended; which as its Tail is long and large, shews much Violence and Ardor, sudden and unexpected Mysteries and Catastrophes, even to the sinking of a Kingdom, Nation, or People.

13. In respect of its great height (having but small *parallax*) it shews it will act its part upon Emperours, Kings, Princes, Noblemen, Popes, Bishops, Arch-Bishops, Abbots, Admirals, Generals and Commanders of Armies, upon Empires, Kingdoms and States, and upon their Counsels, Ministers and Dependents. *Hor. Math. l. 4. c. 10. f. 20.* The places subject to the influence, will be those under ♈, ♌, ♐, ♑ and ♓, which I leave to the consideration of Artists.

14. The latter Comet will afflict those people under ♋, ♏, ♑, and ♓: so that we may say the *Scotch*, *Dutch*, *Romans*, *Italians*, *French*, and those who live in *Vienna* and *Austria* shall severely fall under its malign effects: which Judgments I think are already verified in part, but will be more amply manifest this year. Its effects will begin and end with those of the last of ☌ of *Saturn* and *Jupiter*, and constantly run Parallel with the same.

Ephemeris Comet. 1682.

August.					*August.*					*August.*				
13	15	69	L. Nor		22	6	30	26	N 8	31	18	15	16	N. 2

21	29	38	26	18	30	15	31	17	24	7	30	0	9	35

15. By the help of the *Ephemerides* of these two Comets, and the Rules which we have delivered in Our *Horæ Mathematicæ*, the industrious Artist may be enabled to draw out a Judgment at length, answerable to the number of years wherein their effects shall be made manifest, more especially being considered with the former Conjunction of *Saturn* and *Jupiter*, and the Annual Directions of the same, compared with the Transits of the Planets, which will constantly occur through that length of time.

Balsamum de Chili.

There is lately come from Chili, *a Province in* America, *a most excellent natural Balsam, differing both from that of* Peru *and* Tolu, *but no ways inferiour in Virtues and Excellence, as the several Experiments lately made of it, in the curing of several deplorable Distasts, as inward Bruises, Ulcers of the Lungs, spitting Blood, Coughs, Consumptions, Gout, Palsy, any outward Ach, Pain or Bruise, the Stone and Gravel both in Reins and Bladder, Collick, &c. has given evident demonstration of. It heals also all manner of* Green Wounds, Ulcers, old runing Sores, Punctures and hurts of the Nerves *in any part of the Body, at 2 or 3 times dressing. It is a* natural Balsam, *said to distil from a small Tree in* Chili, *bearing a leaf something differing from an* Olive *leaf, and is thought to be the most precious of all* natural Balsams. *It is not common in the shops of the Apothecaries or Druggists, but is disposed of by the Merchant, to* Mr. Thomas Passenger *Book-seller, at the three Bibles on* London-Bridg, *where it may be had (with printed directions for the use thereof) at 24 s. the pound; or 18 pence the ounce.*

This is also to give notice, that if any Shop-keeper desires to sell my Family Pills *and* Friendly Balsam *(in any Town where they are not yet sold) they may upon their Application to* Mr John Hollier *Chymist, at the blew Ball in* George-yard, Thames-street *near* Brooken-Wharf London, *be furnished with them, in what quantities they please; to whom such a consideration shall be allowed for their pains in vending them as is given to others. With a Catalogue of Chymical Preparations to be given gratis.*

Books published by the Author.

I. Synopsis Medicinæ, *in II. Volums. together with a compleat Anatomical System.* II. Horæ Mathematicæ, *or the* Soul of Astrology, *containing that Art in all its parts.* III. Pharmacopœia Londinensis, *or the* New London Dispensatory. IV. Doron Medicum, *or a* Supplement *to the said Dispensatory.* V. *Suddenly to be published,* Iatrica, *seu* Praxis Medendi, *together with a compleat New Medical Theory, exhibited by way of* Scholia, *the First Vol. There's in the Press* VI. Ars Chymiæ, *or the* Art of Chymistry, *to which is added a Treatise of* Specificks. *Sold by most Booksellers, but certainly by* Tho. Dawks, *at the West End of Thames-street: and* Tho. Passinger *at the 3 Bibles on* London-bridg.
